TIB-E-NIJAT

Camera Vitals Screening for Every Neighborhood Pharmacy

SUMMARY

<280,000 doctors for 240M Pakistanis. A basic vitals check takes hours of travel and waiting. Tib-e-Nijat provides a 30-second tablet camera screening at neighborhood pharmacies.

30s camera rPPG measures pulse, HRV & breathing — Traffic-Light result: Normal, Monitor, or See a Doctor.
Screening tool that sends patients to a doctor (doesn't replace one). Face video is never stored.
~50 PKR per scan (40% pharmacy / 60% us) = ~30,000 PKR/month per store at 20 scans/day.

CORE VITALS

Heart Rate & HRV

Camera rPPG picks up skin micro-color changes; accuracy target within 2 BPM of ECG in hospital trial.

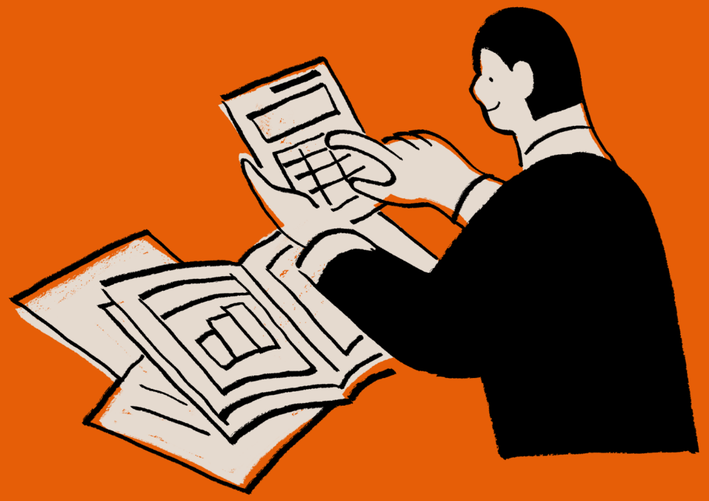

Breathing & Stress

Confidence Meter prompts a retake in poor light; Fingertip + Flash mode handles dark rooms.

Clinical Triage

Simple Traffic-Light result (Normal, Monitor, See a Doctor) refers patients to doctors early.

Demographics

- Target : Native Villages First
- Locations : Tier 2 & 3 Cities
- Income : Pharmacy Counters

Psychographics

Families in Tier 2 & 3 towns wanting a quick 50 PKR check without hours of hospital travel & waiting.

Buyer Persona

Pharmacy owners earning ~40% revenue share & extra walk-ins; starting in our own native villages.

TARGET MARKET

COMPETITIVE ANALYSIS

Key Competitors

- BP & Oximeters (1 metric)
- Oladoc / Marham (Partners)
- ECG Carts

Unique Value Proposition

- Gives partner doctors vitals before the call
- DRAP screening classification + Ethics trial

Strategic Analysis

- Strength
  - On-device privacy: face video is never stored
- Challenge
  - Requires normal room lighting
- Opportunity
  - 50,000+ retail pharmacies
- Mitigation
  - Fingertip + Flash mode & Confidence Retake

1. Now: Pharmacies

Begin in our own native villages to learn from honest feedback, then scale tablet stations.

2. Next: Doctor Apps

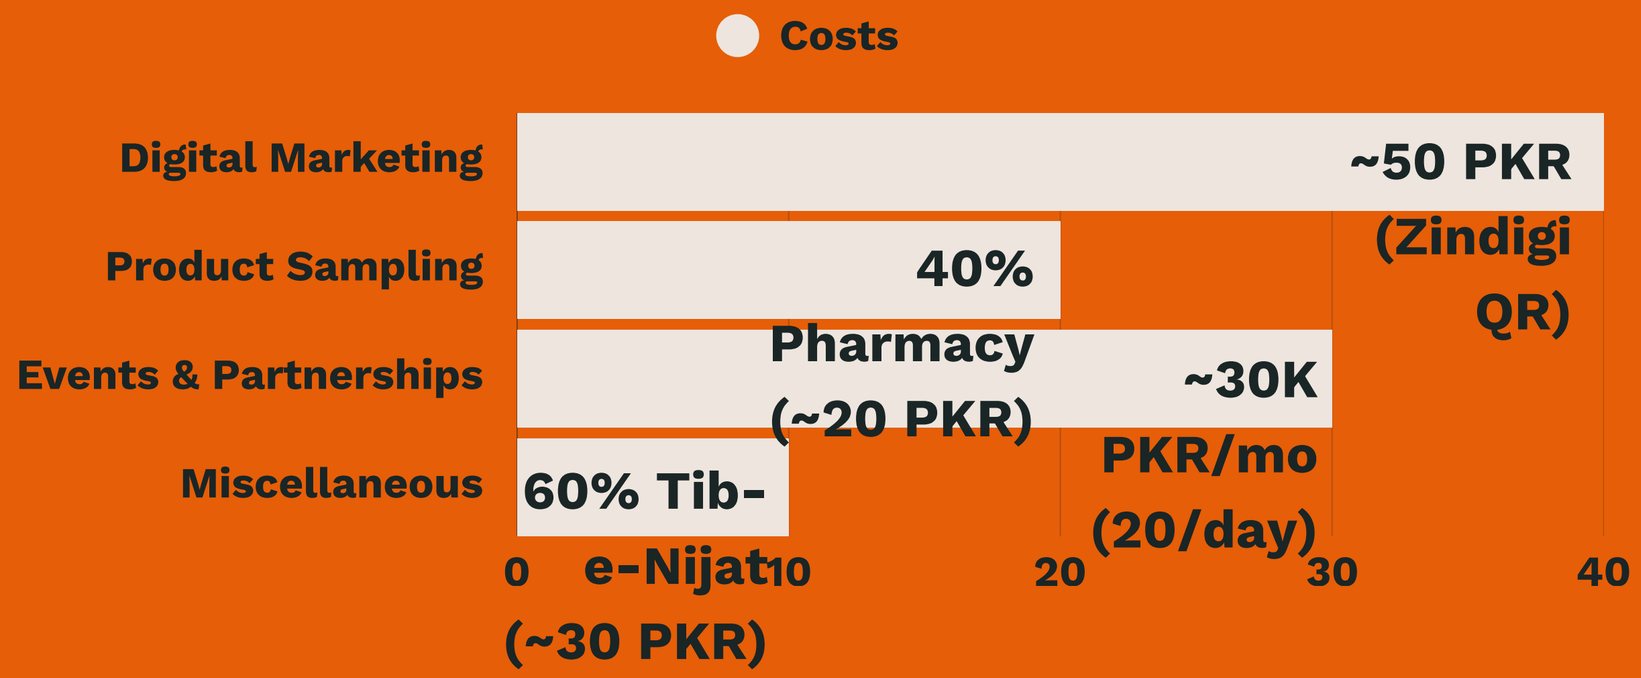

Connect with Oladoc & Marham as partners so doctors see patient vitals before the call.

3. Later: Zindigi Wallet

Digital wallets like Zindigi offer health-check micro-insurance, subject to SECP approval.

ROADMAP

MONTH	ACTIVITY	OUTCOME
M 1-3	Ethics Approval & ECG Trial	100-200 patients tested vs. clinical ECG (target ±2 BPM)
M 4-6	Native Village Pharmacy Trial	App trial in our native villages (no stations yet, real results)
M 7-12	Nearby Towns & Partner Scale	First stations live in nearby towns; 1-2 doctor apps & Zindigi

OUR ASK: 2M PKR

Asking for 2,000,000 PKR: 45% (900k PKR) for first pharmacy stations (tablets, setup, training), 30% (600k PKR) for hospital ECG clinical trial & ethics approval, and 25% (500k PKR) for DRAP regulation, legal & doctor/wallet partnerships. Team: Ahmad Ali (Business), Sachin Kumar (Tech & Demo), Muhammad Uzair (Research & Validation).
